**Cyclin A Ab-6 (Clone 6E6)**

Mouse Monoclonal Antibody

Cat. #MS-1061-S0, -S1, or -S (0.1ml, 0.5ml, or 1.0ml Supernatant)
Cat. #MS-1061-R7 (7.0ml) (Ready-to-Use for Immunohistochemical Staining)
Cat. #MS-1061-PCS (5 Slides) (Positive Control for Histology)
Cat. #MS-1061-PCL (0.1ml) (Positive Control for Western Blot)

**Description:** Cyclins are regulatory subunits of the cyclin-dependent kinases (cdk’s). They are expressed temporally to control transition at different specific phases of the cell cycle. In mammalian somatic cells, cyclin A is required for S-phase and passage through G2-phase.

**Comments:** Ab-6 is excellent for staining of formalin-fixed tissues.

**Mol. Wt. of Antigen:** 60kDa

**Epitope:** N-terminal

**Species Reactivity:** Human. Others-not known.

**Clone Designation:** 6E6

**Ig Isotype / Light Chain:** IgG1 / κ

**Immunogen:** Recombinant N-terminal fragment of human cyclin A protein.

**Applications and Suggested Dilutions:**
- Immunoprecipitation (Native verified)
- Western Blotting (Ab 1:100 for 2hrs at RT)
- Immunohistology (Formalin-fixed only)
  (Use Ab at 1:40 for 60 min at RT)
  ** (Staining of formalin/paraffin tissues is enhanced by boiling tissue sections in 10mM citrate buffer, pH 6.0, for 10-20 min followed by cooling at RT for 20 min.)

The optimal dilution for a specific application should be determined by the investigator.

**Positive Control:** HeLa cells. Tonsil.

**Cellular Localization:** Nuclear

**Supplied As:** Tissue culture supernatant with 0.09% sodium azide, or Prediluted antibody which is ready-to-use for staining of formalin-fixed, paraffin-embedded tissues.

**Storage and Stability:**
Store vial at 4°C. When stored at 2-8°C, this antibody is stable for 24 months.

**Limitations and Warranty:**
Our products are intended FOR RESEARCH USE ONLY and are not approved for clinical diagnosis, drug use or therapeutic procedures. No products are to be construed as a recommendation for use in violation of any patents. We make no representations, warranties or assurances as to the accuracy or completeness of information provided on our data sheets and website. Our warranty is limited to the actual price paid for the product. NeoMarkers is not liable for any property damage, personal injury, time or effort or economic loss caused by our products.

**Material Safety Data:**
This product is not licensed or approved for administration to humans or to animals other than the experimental animals. Standard Laboratory Practices should be followed when handling this material. The chemical, physical, and toxicological properties of this material have not been thoroughly investigated. Appropriate measures should be taken to avoid skin and eye contact, inhalation, and ingestion. The material contains 0.09% sodium azide as a preservative. Although the quantity of azide is very small, appropriate care should be taken when handling this material as indicated above. The National Institute of Occupational Safety and Health has issued a bulletin citing the potential explosion hazard due to the reaction of sodium azide with copper, lead, brass, or solder in the plumbing systems. Sodium azide forms hydrazoic acid in acidic conditions and should be discarded in a large volume of running water to avoid deposits forming in metal drainage pipes.
